Smart Features for Effortless, Faster, and More Intuitive Usage

The GP-3700 is the new high performance color GPS/WAAS Chart Plotter and the GP-3700F is our GPS/WAAS Chart Plotter/Echo Sounder combination unit. Both incorporate the easy-to-use interface from the GP-3500, while adding new enhancements and features. With a variety of innovative functions, short-cut control keys and a 12.1-inch IPS screen that provides clear visibility, the GP-3700 series lets you immediately grasp a situation surrounding your vessel. Large storage capacity for track points, buoy points and marks/lines makes it a perfect solution for long term fishing operations.

1 User customizable keys

User customizable keys allow you to create short-cuts to menus. Customize menus before you leave the dock for faster, effortless and more intuitive operation. A screen shot function allows you to look back at past data and status when you return from your trip.

2 12.1 inch large display

The larger IPS LCD screen, which features a distinctively clear and wider viewing angle, gives you excellent readability.

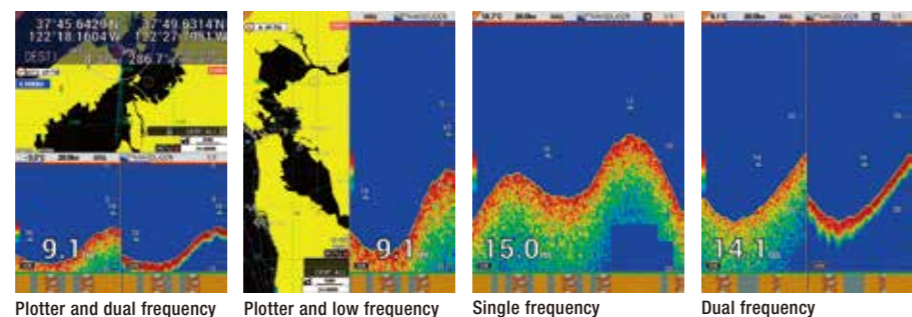

3 Huge storage capacity

The GP-3700 series is capable of storing up to: 30,000 own ship track points, 10,000 TT/AIS/consort/GPS buoy points, 30,000 mark/lines, and can record way points and routes.

4 A variety of display modes

The GP-3700 series provides and displays navigation data in a wide variety of modes. All the display modes can be switched by tapping "DISP" key. Plotter, Compass, Satellite information and Fish Finder* are able to be chosen and customized as you like.

Mark keys

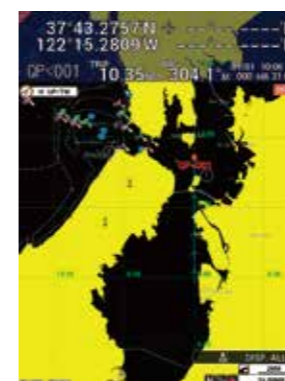

Colorful keys to mark lines and points on the display

Trackball

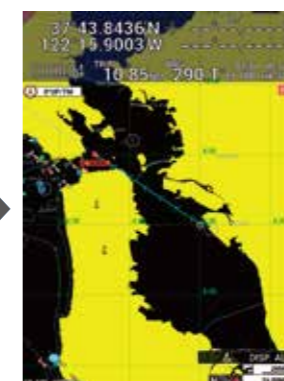

can be used to quickly move the cursor, while arrow keys can be used for more precise cursor manipulation.

A variety of orientation modes

The GP-3700 series has Head Up, North Up, Auto Course Up, Course Up, Go To Up, and Specified Direction Up display modes. Specified Direction Up mode is a target-oriented navigation map, allowing the map to remain vertical in the direction of the target. You can choose the desired display mode to suit operational needs.

Scroll-Back *for GP-3700F

By scrolling back the history on the Fish Finder screen, you can find the fishing ground/fish targets again and drop a mark, so that you can plot a course back to that area.

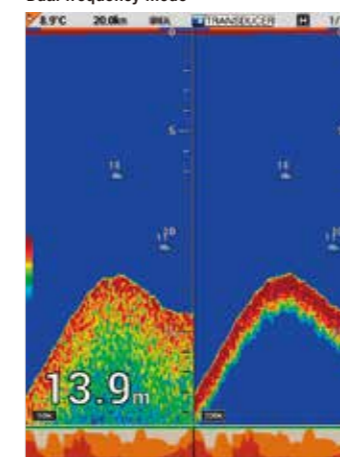

ACCU-FISH™ and Bottom Discrimination System * for GP-3700F

Single frequency mode

Graphic mode
 Legend: Rocks (dark red), Gravel (red), Sand (orange), Mud (grey)

Dual frequency mode

Probability mode
 Legend: Rocks (dark red), Gravel (red), Sand (orange), Mud (grey)

ACCU-FISH

Individual fish size is calculated from echo strength. ACCU-FISH™ can detect fish sizes of 10 to 199 cm, at depths of 2 to 100 m.

Bottom Discrimination System

Bottom Discrimination feature enables the fish finder to indicate if a major component of the seabed is detected in rocks, gravel, sand or mud.

*Notes:

- Use at a depth of 5 m – 100 m.
- Use transducer in transom mount or thru-hull mount.
- To show a consistent display of the actual bottom, set the range display of the fish finder screen to "auto".
- Enter the ship's draft value.
- Use a ship speed of 10 kn or less.
- In some instances, bottom component indicated on the display may differ from its actual bottom structure.

INTERCONNECTION DIAGRAM

— Standard supply
 — Optional or local supply

- *1: Use when the display unit has no beacon receiver.
- *2: Use when the internal beacon receiver is installed to the display unit.
- *3: Required for 1 kW transducer (50B-6, 50B-6B, 200B-5S, 50/200-1T). Only for GP-3700F
- *4: Only for GP-3700F
- *5: Only one GP-3700F or GP-3700 can be connected when you are using a NAVpilot-700 series.
